10(A) Line 235: There are currently no existing material defects. However, it was discovered, on or around February 26, 2025, that the fittings to the hot water tank had failed and developed a leak. The leak led to a spread of mold around the hot water tank in the utility closet and the shared wall of the primary bedroom closet. Upon discovery, the water was immediately shut off. The contractor who performed the installation of the home quickly replaced the fittings on the hot water tank, provided mold remediation in all necessary areas and replaced the affected drywall. Upon completion, Sellers engaged a mold remediation expert, T&M Restoration, who performed a visual inspection for visual surface growth in the affected area. T&M Restoration indicated the area appeared as it should with no sign of water damage and no odor associated with wet materials. T&M indicated there were no signs of concern and did not have further recommendations. To be sure the mold has been eradicated, Sellers are also engaging T&M Restoration to perform a mold spore test.

#### **OBJECTIVE**

-Complete visual inspection above property for V.S.G visual surface growth.

#### **OBSERVATION**

On 3-18-25 Kevin Triplett with T&M Restoration completed a limited visual inspection, specifically in the master closet and laundry room.

The area observed appears to be as they should. No sign of water damage and no odor associated with wet materials.

I did not see any sign of concern at this time.

No recommendations are needed.
