# STATEMENT OF WATER TREATMENT SYSTEM FOR POTABILITY

NOTICE IS HEREBY GIVEN, that on September 24, 2013, TIMOTHY J. WOODWARD JR. applied for a building permit with the STEVENS COUNTY BUILDING DEPARTMENT to place a Manufactured Home.

The permit application was associated with real property in Stevens County legally described as:

Tax #2 in Section 15, Township 34 North, Range 39 in Stevens County, Washington.

Assessor Parcel #2194900 Site Address: 705-B Old Arden Hwy, Colville, WA 99114

Information provided by the applicant indicates that the water system serving the above referenced property **does not** comply with the recommendations for minimum standards for private water systems which were established (in 1991 updated in 2012) for Stevens County by the N.E. Tri-County Health District, Environmental Health Department and Stevens County Building Department, for the following reasons:

Water source is a private drilled well 20 feet deep located upon the property that will serve the single family residence. The well water was tested on October 2, 2013 and showed evidence of Uranium 67.8 and of Nitrate 14.9 micrograms/liter both of which exceed the maximum allowable contaminant level of 30 micrograms/liter for Uranium and 10 micrograms/liter for Nitrate.

Owner has provided a statement that they will install a point of use treatment system to remove/reduce Uranium and Nitrate from the water system to comply with the minimum standards prior to occupancy of the home. Manufactured Home Placement Permit # 18205 was issued on 10/22, 2013 for the single family residence subject to the condition that the water treatment system identified in a Letter dated October 10, 2013 by Fogle Pump and Supply 316 W. 5th Street, Colville, WA will be installed prior to occupancy and use of the Manufactured Home. Treatment system requires maintenance.

An independent evaluation of the water system has not been made by either the N.E. Tri-County Health District or the Stevens County Land Services, Building Division.
